

Cloud Communications Made Better with The Power of Local

LEADING-EDGE TECHNOLOGY

As more businesses shift to remote and hybrid work models for their employees, the adoption of cloud communications and collaboration solutions continues to grow at a record rate. Cloud communications solutions – including business phone, chat, video conferencing, file collaboration, contact center, and more – enable businesses of all sizes to keep their employees connected, collaborating, and productive, while also allowing them to deliver responsive and superior care for your customers. Due to the very nature of the cloud, all of this can happen from wherever employees are located - the tools go where they go, with desktop and mobile apps that turn mobile phones, laptops, desktops, and tablets into full communications platforms.

But not all cloud communications solutions are created equal. Be sure to choose the right solution that is secure, reliable, and easy to use. The all-in-one business cloud communications platform, Elevate, is that solution. With a comprehensive set of communications and collaboration tools, Elevate can help you maximize employee productivity across your company and deliver exceptional customer experiences that will help your business grow.

LOCAL SERVICE DELIVERY

In business, trust matters. Nobody wants to be an anonymous support ticket who waits on hold to get answers from an agent in a far-away service center. Immediate service and hands-on knowledge of your company and business community is why a local service provider is so important.

We are proud to offer Elevate, the industry-leading cloud communications platform AND we are local. Our experts are part of your business community, standing ready with the right knowledge to support you whenever you need it. When you contact us, we can come right to your office and help you install and manage the very best configuration for your business quickly and expediently. We'll strive to understand your needs and we'll be there every step of the way so you can enjoy the advantage of industry-leading business communications without having to deal with the complexity of technology. And that will free you up to focus on what matters most - growing your business. When you choose us, you get the best of both worlds – a leading communications and collaboration platform with the advantages of local service.

Only local services providers can offer a complete suite of additional services:

- Pre-deployment network testing
- Customized solution design
- Network cabling
- Phone and hardware installation
- System configuration and management
- User training
- Service monitoring
- Responsive support
